# Triumph of Donald Trump

On 10th November 2016, the world witnessed a transition in the largest economic and political country, as Donald. J. Trump was

elected as the 45th President of USA in a stunning culmination of an explosive campaign that took long held ideas of American democracy. The triumph for Mr. Trump, 70, a real estate developer-turned-reality television star with no government experience. Existing Republican lead-

ers had little choice but to warm up to President Trump, Career Republican leaders who have taken a principled stand against Trump became politically non entities. And it was a decisive demonstration of power by a largely overlooked President and it is shocking because he won despite his blatant sexiest, raciest attitude and bombastic speeches. It's scary because America is essentially powerful nation and in the world, which now makes him the most powerful person of the world. Central to Trump's campaign was that the country has been in decay, and his simple mantra of "make America great again" was a motto that appealed to many rural voters.

Donald Trump has only joined the bands such leaders from around the world. Experts said it will take several months to fully determine all the details of why Trump pulled off a victory. Moreover after four years, there will be election for the next POTUS.
