## The need of communication

**Swati Mishra**

Communication is very important for every living being either it is animal, bird or human being. All are gifted with the power to communicate in some way or the other.

Human are the most developed creature of God who is also gifted with the power of thinking. With his thoughts and imagination, he created words, languages and writing to communicate efficiently. There are thousands of languages in this world which are discovered by humen. With the development of their brain and thought he discovered various means to communicate. Today in this 21st

century, he is able to talk and communicate to far distant places with the help of words and technology. He has also developed tools for easy mass communication. The media world operates with the help of these mass communication tools which are in the form of electronic media, print media and social media. We never know what new developments will be done in future but yes without communication nothing is possible.

Hence for every activity, development and research, communication is essentially required. Either its verbal, non verbal or written, the value of communication can't be ignored. Communication is not just important for human beings but for every living being to sustain.

## Child labour: a serious issue of developing society

**Nikita Chaudhary**

Child labour is becoming a serious social problem in India. We know that every child is the

hope and future of our nation. But, child labour spoils and destroys the future of little children. Even as per the India constitutional laws, child labour is a serious crime. A child who is below the age of 14 cannot be employed but still various children are working long hours in small and large industries, factories and other sectors to earn little money for their families.

A child below poverty line becomes a labour because their parents insist them to do such jobs to satisfy their financial needs. Child labour is banned in India, still most of the children are working as laborers. Government should ensure that each and every child gets the opportunity to go to school for getting proper education to

improve their future. Even several government schools are developed to provide basic education to little children who are deprived of their basic right due to their financial condition. These government and non government schools also provide books and meals along with basic education. Education is a must for every child as nowadays illiterates person can not survive in developing society. Illiteracy is also a very big reason for criminal activities happening in our society. Hence, to prevent child labour it is very important to educate child as they are the "Bright and Right" future of our nation. Each and every child have right to enjoy his or her childhood by taking part in various playing and studying activities.

An increase in employment opportunity for adult would help in overcoming the problem of poverty. To stop child labour it is very important that laws should be enforced and implemented strictly by our government.
